SKILLS

- Java/C# (OOP)
- JavaScript
- React
- Node.js
- MongoDB
- Python
- HTML
- CSS
- Teamwork skills
- Ability to learn quickly
- Work with clients
- Analytical skills
- Taking responsibility
- CCNA Diploma from Cisco

LANGUAGES

- **Russian**
  Native
- **Hebrew**
  Fluent
- **English**
  Advanced

EXPERIENCE

March 2023 - December 2023 │ JavaScript, React, MySQL, Node.js, HTML, CSS

Project Execution Management System

A comprehensive system was developed for a client, covering various stages of the process. This included defining system goals, conducting task analysis, and gathering user requirements.
Additionally, system design involved creating the database structure, designing the UI/UX for the website, and outlining the core functional blocks of the system.
Subsequently, appropriate technologies were selected, and both frontend and backend components were coded.
Following the development phase, rigorous testing was carried out to ensure functionality and reliability.
The website was seamlessly integrated with the chosen database system, MySQL.

2016 - 2018 │ Bank Otkritie Financial Corporation
Branch Manager

2011 - 2016 │ Bank B&N - Public Joint-Stock Company
Branch Manager, Sales Manager, Credit Manager

EDUCATION

2021 - 2023 │ TECHNION Israel Institute of Technology (The National School for Handassaim) │ **Software Practical Engineering**
Diploma with Distinction, GPA: 90

2005 - 2011
Financial University under the Government,Russia

Master's degree in Economics in Accounting, Analysis, and Auditing in Banks

PROJECTS

1. **Project Execution Management System (JavaScript, React, MySQL, Node.js, HTML, CSS)**

The project was completed for a client. The leaders of the construction company wanted to streamline operations and enhance control within their organization.
System Goals:
The system's goals include managing multiple projects of the organization by tracking project timelines and documenting defects through images (quality control). These will be performed according to the user's permission level.

2. **Real estate website with advertising listings of houses**

3. **Execution Project Management System (MongoDB)**
